SENSATIONAL ROOFLINES

Under crystal blue skies or silhouetted against the gathering storm, Hatteras designer shingles make a bold statement in any weather: Bring it on.

This is one tough roof that manages to keep looking its best, no matter what the elements throw at it. And it's one smart investment for those who appreciate how its form follows function.

the windcatcher that's an eye-catcher

hurricane strength & a whirlwind design

The sweeping lines and rich color palette of Hatteras designer shingles hide a deep inner strength that stands up to 110 mph winds and comes out looking great.

oversized protection

Hatteras' premium oversized construction (18" x 36") is one of the largest shingles you can buy and its extra-heavy mat and dual self-sealing strips made with an aggressive sealant formulation combine to make Hatteras as big on performance as it is on looks.

a natural palette

When you install Hatteras, you install the color palette of nature's coasts, from Lighthouse Red and Newport Green to Windswept Gray and Outer Banks.

WinterGuard™

Waterproofing underlayment prevents leaks caused by ice dams and wind-driven rain in the vulnerable areas.

Roofers' Select™

High-performance underlayment is a secondary barrier against leaks for the entire roof.

Shingles and Accessories

High-quality shingles are covered by one of the best warranties in the business. Accessory products - starter course, and hip and ridge cap shingles - complete your roof from start to finish.

Ventilation

Proper attic ventilation improves air circulation. Air Vent, Inc. ventilation products are recommended for use in connection with the Integrity Roof System.

tips for selecting a roof

1. Think big - View a full-sized shingle, not just a swatch or sample.
2. Be real - Look at actual houses where the house and roof color combinations are similar to what you're considering.
3. Watch the light - As you look, notice how colors appear under changing light conditions and at various times of day.
4. Consider the pitch - Look for roofs with a similar pitch to your own. A roof's pitch affects the way you see its color.
5. Ask your contractor - They might be able to point you to a home where they've installed a roof of your style and color.

hatteras specifications

- Oversized extra-heavy fiber glass mat with dual stripes of CertaSeal Plus advanced modified sealant
- Deep shadow lines create look of natural slate
- 235 lbs. per square
- UL Class A fire resistance rating

not sure which color to pick?

CHECK OUT CERTAINTEED'S COLORVIEW.™

ColorView™ is CertainTeed's interactive tool to help you visualize product style and color options. Using it is easy. Just go to www.certainteed.com/colorview.

We've put green thinking behind our shingle and environmentally sound manufacturing ahead of standard industry practices to produce a product line that is green and growing.

CertainTeed is committed to resource conservation. Our roofing manufacturing facilities recycle close to 90% of the production waste into asphalt materials used for the construction of roads. We also integrate recycled content into many of our packaging needs including corrugated rolls and kraft paper.

They're small steps in a big world. But we're green and growing everyday. It's a commitment we take seriously at CertainTeed.

easy selection

What's behind our #1 rating?

Builders and remodelers across America know certain things to be true of CertainTeed. For starters, we've been in the roofing business for over 100 years, we have thousands of satisfied homeowners. The process of building that satisfaction begins the moment you turn to us.

CertainTeed offers you the broadest range of color and style choices. But you'll see it's not style over substance. You'll get a roof that's made from the highest quality materials and backed by a strong warranty program. It's our promise to you: quality made certain, satisfaction guaranteed.

Add a little accent to your roof.

A stylish finishing touch for capping hips and ridges, Hatteras accessory is available in colors to match your Hatteras shingles. For the best performance, use CertainTeed High-Performance Starter—the only approved installation alternative to using the shingles themselves

#1 rating

long-term protection

Color Companion Products™

With CertainTeed Flintlastic® SA, you can coordinate flat roof areas like carports, canopies and porches with your main roof. Flintlastic SA is a self-adhering low slope roofing product available in eight colors that match some of the most popular CertainTeed shingles. Ask your contractor for more information.

NOTE: Due to limitations of printing reproduction, CertainTeed can not guarantee the identical match of the actual product color to the graphic representations throughout this publication.

40-year limited transferable warranty, including 5-year SureStart™ protection, are applicable only in the United States, its territories and Canada; for products sold outside these areas, please refer to the International Warranty for specific details and limitations.

WARNING: FOR LOW-VOLUME RAIN AND SALT-FOG AREAS

In areas of low-volume rain (defined as insignificant rainfall during a 90-day period) and "salt fog," such as parts of the Southern California coastline, copper released by algae-resistant (AR) granules can react with the aluminum in gutters, leading to severe corrosion of the gutters. Therefore, in such regions, it is strongly recommended that aluminum gutters not be used with algae-resistant shingles. Vinyl or copper gutters are recommended.
