Comfort

Warmth

Quiet

Dressing your home in CedarBoards Insulated Siding is like wrapping your family in a cozy blanket. Inside, you'll enjoy a quieter, more comfortable home. Outside, you'll appreciate the authentic look of natural wood, enhanced by distinctive colors and finishing touches.

The outstanding durability of CedarBoards offers superior protection you can count on for years to come. CedarBoards is also an excellent "green" building product, one recognized for its environmentally friendly benefits.

CedarBoards Insulated Siding offers the advantages that come with both innovation and conservation. Your home becomes a haven of comfort and quiet, made possible by a material that supports the effort to preserve natural resources and the environment.

Innovation

CedarBoards Double 6" Clapboard in arbor blend and Cedar Impressions Double 9" Staggered Rough-Split Shakes in natural clay

Conservation

CedarBoards offers complete comfort – both in performance qualities and environmental benefits. You'll enjoy warmth, quiet, durability and beauty—and the knowledge that you achieved it all with a “green” product choice.

Sustainable

The innovative core of CedarBoards siding can help meet the performance guidelines of an ENERGY STAR® qualified new home.

Enhanced Energy Savings

CedarBoards custom-contoured foam increases your home's energy efficiency, providing an extra measure of comfort to your interior spaces. You'll feel warmer in winter and cooler in summer. In fact, our innovative foam technology can reduce heating and cooling energy loss by as much as 25%, increasing R-Value up to a 5.0 rating. CedarBoards offers 300% more R-value than traditional siding materials.

Single 7" Claspboard in cypress

Quiet Interiors

The outside world stays outside in a home sided with CedarBoards. The innovative foam backing blocks exterior noise, enhancing interior acoustics.

Comfort

Protection

Water vapor that seeps into hidden wall cavities can result in mold, mildew and fungi, and contribute to wood deterioration. CedarBoards Insulated Siding has excellent breathability, so you can breathe easy. It absorbs little water and has a permeability rating of 5.0 perms per square inch. Material with a perm rating of more than 1 is not considered a vapor barrier and won't trap moisture behind the wall. It allows moisture to escape – and frees you from concerns about the structural damage and health effects caused by excess moisture.

Commitment to Sustainability

CertainTeed respects the environment through the responsible development of sustainable building products and systems. While enjoying the comfort of CedarBoards, you'll also enjoy knowing that you've made a prudent "green" building choice.

- ◆ Uses minimal raw materials and generates zero waste in the manufacturing process.
- ◆ Reduces the use of natural resources such as cedar and other woods.
- ◆ Prevents toxins from entering the waste stream because it never needs painting or caulking.
- ◆ Helps meet the stringent requirements of LEED and NAHB Green Building Guidelines.
- ◆ The insulating foam backing contributes to energy conservation.

From contemporary to classic, striking to subtle, CedarBoards' wide choice of colors and profiles gives you the freedom to express your unique outlook on life, and to beautifully blend your sense of home with your sense of style.

Life Style

Home Style

Molded from selected cedar boards, designed in a classic wide-board style, and strengthened with a custom-contoured foam backing, CedarBoards has the look and substantive feel of beautifully crafted wood siding.

Natural Cedar Texture

The natural wood appearance of CedarBoards comes straight from nature. Real cedar boards are hand selected. Then, using TrueTexture™ technology, CertainTeed creates a custom mold and transfers the grain pattern directly onto CedarBoards siding panels.

Classic Styles

In addition to Single 7" and Double 6" wide-board profiles, CedarBoards is offered in Double 4-1/2" Dutchlap and Double 4" Clapboard.

Straight Even Face

CedarBoards panels have a straight, even face without the concavity common to ordinary vinyl siding.

Deep 3/4" Straight-Edge Panel Projection

Wood siding crafted from newly-sawn cedar typically features a deep, panel projection.

CedarBoards™ Custom Contoured Foam

CedarBoards custom contoured foam backing increases R-value, improving the home's thermal efficiency. It also adds strength and rigidity for a solid look and feel.

Single 7" Clapboard in cypress. Available in 12'3" and 16'8" lengths.

Double 6" Clapboard in natural clay. Available in 12'6" and 16'8" lengths.

Double 4-1/2" Dutchlap in oxford blue

Double 4" Clapboard in light maple

Color

Color performance, impact resistance and durability are assured through our exclusive PermaColor™ System, a blend of our own Certavin™ resin, superior micro-ingredients and state-of-the-art pigment chemistry.

CedarBoards™ XL... Long on Looks

Double 6" and Single 7" CedarBoards XL panels are designed for special areas of the home where a continuous-panel appearance is preferred. The extra length of CedarBoards XL can significantly reduce seams for a smoother, more continuous look.

The Difference is Seamlessly Clear

Two Story Wall, 20' Wide

Extra long length available in Double 6" and Single 7" profile only.

Little things mean a lot. A colorful highlight. A beautifully crafted accent. Something bold. Something refined. Whatever touches of style you have in mind, CedarBoards Insulated Siding gives you the options to mix and match the ideal complements to a beautiful exterior design.

Meticulously engineered and designed for precision performance, CedarBoards Insulated Siding is a choice you can trust. From the safety of an accurate installation, to the features that ensure long-term strength and durability, CedarBoards contributes to a home you'll enjoy for a lifetime.

Precision

Performance

For strength, safety and long-term durability, nothing performs like CedarBoards. With this unique siding, the best in innovative design and engineering come together in a product you can trust for a lifetime.

Installation Innovation

CertainTeed is the only siding engineered to include an integral installation guide on each panel. The patented **STUDfinder™** Installation system is designed to help ensure a precise installation for optimum siding performance.

Accuracy and Quality

STUDfinder is engineered to align nail slots precisely with construction standards of 16" on center, with indicator letters centered under each nail slot to make it easy to locate studs and help ensure accuracy.

Enhanced Safety

An accurate installation does more than secure the siding panels. It can also help enhance safety by assuring that nails do not impact anything located between the studs, including plumbing or wiring. Penetrating these items could result in water damage, fire or other dangers.

Fire

Water Damage

Wind Damage

Strength

nice

Wind Resistance

Duralock™ features an oversized rigid tear-drop shape which is substantially larger than many competitor's locks. Combined with the added rigidity of the foam reinforcement, CedarBoards is highly resistant to blow-off, and is designed and tested to withstand hurricane force winds.

safety

Hazards

Protection from Insects

With CedarBoards, you'll enjoy the beautiful look of wood, without the problems caused by wood-loving insects. CedarBoards is resistant to termites and meets all applicable building code requirements for ground contact. It is registered with the EPA and is safe for humans and pets.

Security

Strength and Rigidity

CedarBoards' rigid foam backing and high-quality vinyl construction create a firm wall of protection for your home, with impact resistance up to five times that of traditional hollow vinyl siding. This outstanding product also stands up to hail and other unpredictable forces of nature.

A product and company you can trust completely is hard to come by. With CedarBoards, confidence comes easily, and with CertainTeed's environmental commitment to the responsible development of sustainable building products and systems, you can be even more comfortable with your purchase decision.

The Perfect Balance of Beauty and Performance

CedarBoards is the siding of choice for homeowners who understand the benefits of balance:

Interior warmth and quiet ...

provided by an environmentally friendly "green" building product

Natural wood beauty and style

in an advanced material that requires little upkeep

Protection for your home and family

delivered simply and effectively through innovative design features.

A Unique System of Benefits
